# Architectural Summer Intern

**Mackey Mitchell Architects, P.C.**

Are you ready to apply your academic training, deepen your understanding of the architectural profession, and contribute to meaningful projects that shape the built environment? Our summer internship program offers an immersive experience designed to do exactly that.

At **Mackey Mitchell Architects**, interns become part of the design conversation from day one. You'll contribute ideas during charrettes, participate in site visits, and collaborate in committee meetings. We tailor each internship to individual strengths—whether your passion lies in graphics, sustainability, research, or technical detailing—and provide exposure to the business of architecture through discussions on licensure, marketing, project management, and firm operations. This isn't just a summer job – it's an investment in your future.

Mackey Mitchell is a nationally recognized firm creating environments that foster learning, connection, and well-being. With expertise in higher education, civic, and cultural projects, we design spaces that reflect the people they serve. Collaboration, curiosity, and innovation drive our process as we explore new ideas to improve the built environment. With offices in St. Louis, Dallas, and Asheville, we blend regional insight with national reach to deliver architecture that inspires and endures.

At MMA, we believe in the strength of a diverse and passionate team. Every person in our firm brings a unique perspective that enriches our culture and work. The position is available for any of our office locations.
